

Default dead time: legacy cumulative-sum blink extraction

— Raw cumulative polarity Spline start-stop window — Retained peak — First/last ROI event
— Interpolated cumulative polarity

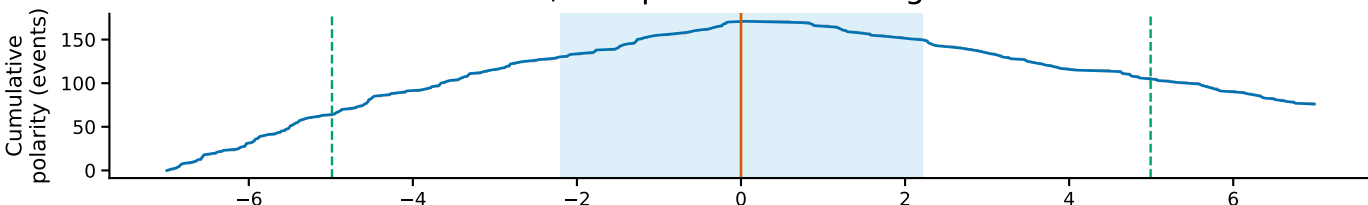

Random blink 1: ROI 15436, 105 positive + 48 negative events

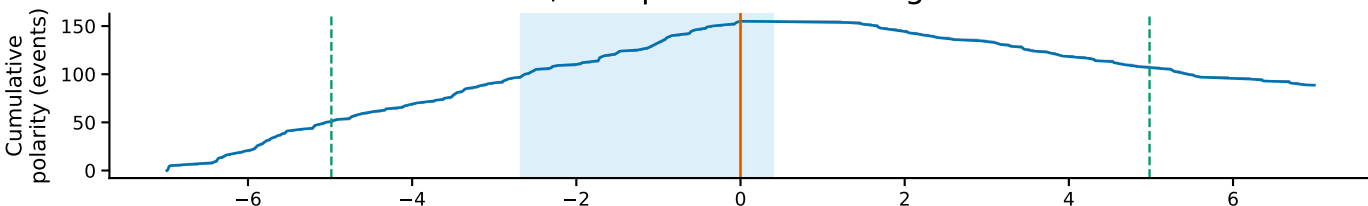

Random blink 2: ROI 13733, 147 positive + 70 negative events

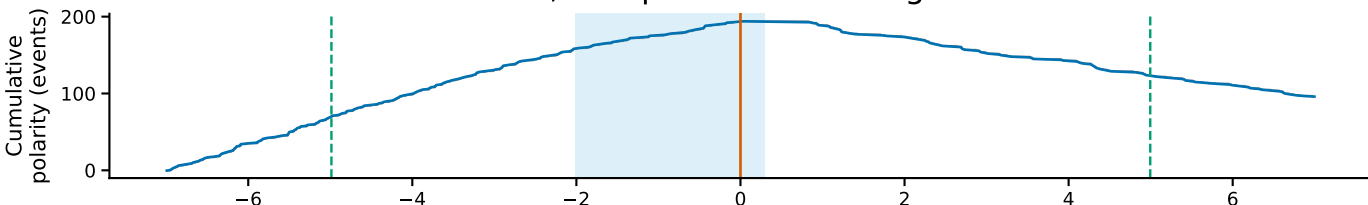

Random blink 3: ROI 17460, 126 positive + 66 negative events

Random blink 4: ROI 11593, 115 positive + 48 negative events

Random blink 5: ROI 19445, 143 positive + 71 negative events

Time from retained peak (ms)
